

RESOLUTION R-4946

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF KIRKLAND APPROVING AMENDED DESIGN GUIDELINES FOR PEDESTRIAN ORIENTED BUSINESS DISTRICTS AND AUTHORIZING THE MAYOR TO SIGN.

WHEREAS, the Planning Commission considered the proposed amendments to the Design Guidelines for Pedestrian Oriented Business Districts at its public hearing on November 15, 2012, in association with related amendments to the Kirkland Zoning Code; and

WHEREAS, the City Council has determined that it is appropriate to amend the Design Guidelines for Pedestrian Oriented Business Districts as they directly support Ordinance No. 4392 (Parker Comprehensive Plan and Zoning Amendments) and under Kirkland Municipal Code 3.30.040 design guidelines bearing the signature of the Mayor and Director of the Department of Planning and Community Development are adopted by reference;

NOW, THEREFORE, be it resolved by the City Council of the City of Kirkland as follows:

Section 1. The amendments to the Design Guidelines for Pedestrian Oriented Business Districts, attached as Exhibit A, are approved.

Section 2. The Mayor is authorized to sign the amended Design Guidelines for Pedestrian Oriented Business Districts.

Passed by majority vote of the Kirkland City Council in open meeting this 11th day of December, 2012.

Signed in authentication thereof this 11th day of December, 2012.

MAYOR

Attest:

City Clerk

Introduction

This document sets forth a series of Design Guidelines, adopted by Section 3.30 of the Kirkland Municipal Code, that will be used by the City in the design review process. For Board Design Review (BDR), the Design Review Board will use these guidelines in association with the Design Regulations of the Kirkland Zoning Code. To the extent that the standards of the Design Guidelines or Design Regulations address the same issue but are not entirely consistent or contain different levels of specificity, the Design Review Board will determine which standard results in superior design. For Administrative Design Review (ADR), the Planning Official will use these guidelines when necessary to interpret the Design Regulations. They are also intended to assist project developers and their architects by providing graphic examples of the intent of the City's guidelines and regulations.

Most of the concepts presented in the Design Guidelines are applicable to any pedestrian-oriented business district.* "Special Considerations" have been added, such as for Downtown Kirkland, to illustrate how unique characteristics of that pedestrian-oriented business district relate to the Guideline.

The Design Guidelines do not set a particular style of architecture or design theme. Rather, they will establish a greater sense of quality, unity, and conformance with Kirkland's physical assets and civic role.

The Design Guidelines will work with improvements to streets and parks and the development of new public facilities to create a dynamic setting for civic activities and private development. It is important to note that these Guidelines are not intended to slow or restrict development, but rather to add consistency and predictability to the permit review process.

* The guidelines also apply to residential development in the Central Business District (CBD), the Juanita Business District (JBD), the North Rose Hill Business District, the Market Street Corridor (MSC), Totem Center and to mixed use development throughout the City.

and Planned Area
5C (PLA5C);

Kirkland Design Guidelines

The drawing below illustrates many of the design Guidelines described in this appendix

- 1 Pedestrian plazas and places for vendors encouraged through several regulations.
- 2 Buildings on corner lots may be required to incorporate an architectural or pedestrian-oriented feature at the corner. Many options are possible including plazas, artwork, turrets, curved corners, etc.

Special architectural requirements placed on use of concrete block and metal siding.

- 3 "Architectural scale" requirements direct large buildings to fit more comfortably with neighboring development. This example employs building setbacks, decks, curved surfaces, and recessed entries to reduce appearance of building mass.
- 4 Parking garages on pedestrian-oriented streets or through-block sidewalks may incorporate pedestrian-oriented uses or pedestrian-oriented space into front facades.

Street trees required along certain streets.

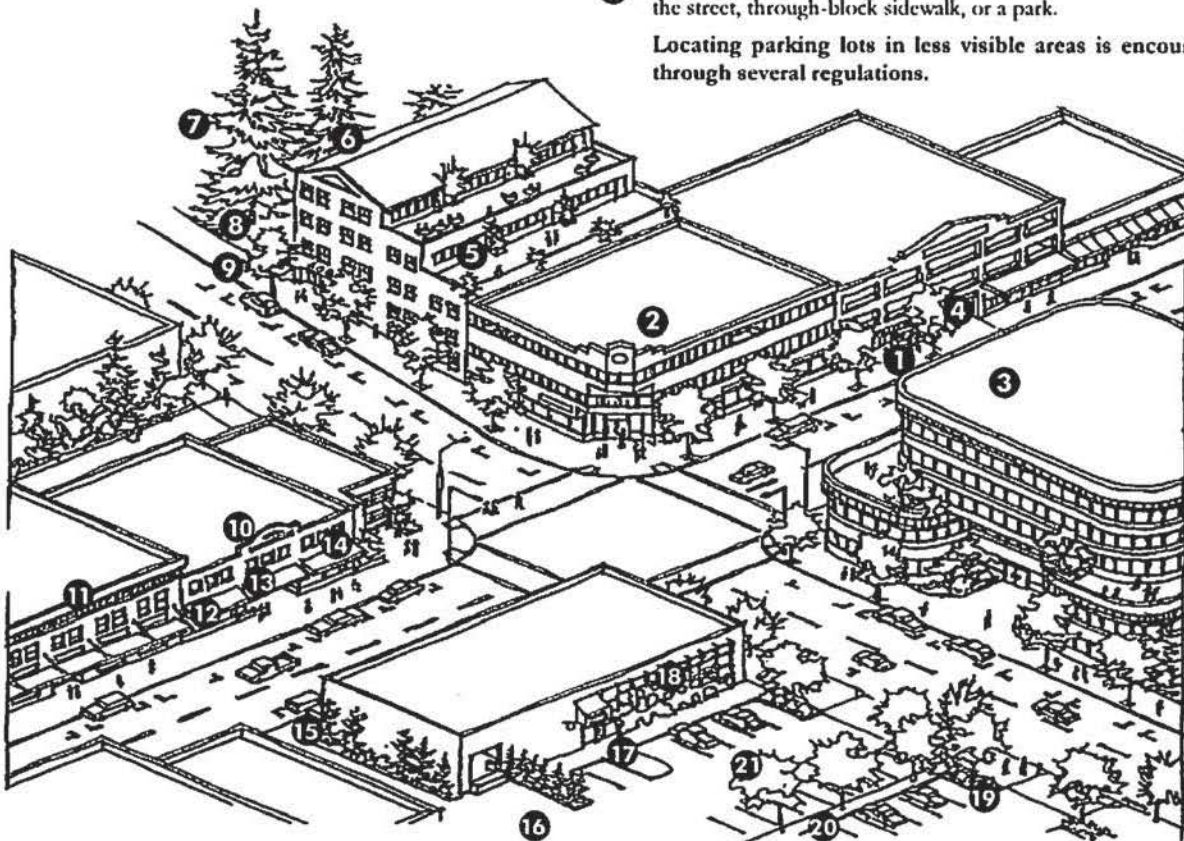

- 5 Human scale features such as balconies or decks, bay windows, covered entries, gable or hipped rooflines, multiple paned windows, or pedestrian-oriented space may be required.
- 6 More flexible method of measuring building height on slopes.
- 7 New policies regarding tree protection and enhancement of wooded slopes. Standards for size, quantity, quality, and maintenance of landscape plant materials are set by the Zoning Code.

- 8 Standards for size, quantity, quality, and maintenance of landscape plant materials are set by the Zoning Code.
- 9 Standards are set for pathway width, pavement, lighting, and site features on required major pathways and public properties.
- 10 A building cornerstone or plaque may be required.
- 11 Covering up existing masonry or details with synthetic materials is restricted.
- 12 Ground story facades of buildings on pedestrian-oriented streets or adjacent to parks may be required to feature display windows, artwork, or pedestrian-oriented space.
- 13 Pedestrian weather protection required on pedestrian-oriented streets.
- 14 Architectural detail elements such as decorative or special windows, doors, railings, grillwork, lighting, trellises, pavements, materials, or artwork to add visual interest may be required.

Size of parking lots abutting pedestrian-oriented streets may be restricted.

- 15 Quantity and locations of driveways are regulated.
- 16 Visible service areas and loading docks must be screened.
- 17 Provision for pedestrian circulation is required in large parking lots.
- 18 Blank walls near streets or adjacent to through-block sidewalks must be treated with landscaping, artwork, or other treatment.
- 19 Screening of parking lots near streets is required.
- 20 Standards for curbs, signing, lighting, and equipment are set for parking lots.
- 21 Internal landscaping is required on large parking lots visible from the street, through-block sidewalk, or a park.

Locating parking lots in less visible areas is encouraged through several regulations.

Purpose of the Design Guidelines for Downtown Kirkland

In 1989 the Kirkland City Council adopted Kirkland's Downtown Plan which set a vision for the downtown's future and outlined policies and public actions to make that vision a reality. One of the recommended actions is the adoption of a set of Downtown Design Guidelines to be used in reviewing all new development and major renovations in the downtown area. The goal of the Design Guidelines as stated in the plan is to

... balance the desired diversity of project architecture with the equally desired overall coherence of the downtown's visual and historic character. This is to be achieved by injecting into each projects' creative design process a recognition and respect of design guidelines and methods which incorporate new development into downtown's overall pattern.

In addition, the guidelines are intended to further the following urban design goals stated in the plan:

- ◆ Promote a sense of community identity by emphasizing Kirkland's natural assets, maintaining its human scale, and encouraging activities that make downtown the cultural, civic, and commercial heart of the community.
- ◆ Maintain a high-quality environment by ensuring that new construction and site development meet high standards.
- ◆ Orient to the pedestrian by providing weather protection, amenities, human scale elements, and activities that attract people to downtown.
- ◆ Increase a sense of continuity and order by coordinating site orientation, building scale, and streetscape elements of new development to better fit with neighboring buildings.
- ◆ Incorporate parks and natural features by establishing an integrated network of trails, parks, and open spaces and maintaining existing trees and incorporating landscaping into new development.
- ◆ Allow for diversity and growth through flexible guidelines that are adaptable to a variety of conditions and do not restrict new development.

Insert "Purpose of the Design Guidelines for PLA5C" here (wording is shown on the following page).

Purpose of the Design Guidelines for Juanita Business District

The Juanita Business District Plan was adopted in 1990 by the City Council. It states that "the underlying goal of redevelopment in the business district is to create a neighborhood-scale, pedestrian district which takes advantage of the amenities offered by Juanita Bay."

As part of the Juanita Business District Plan, Design Regulations and Design Guidelines were established for new development and major renovations in the Business District (JBD). These guidelines and regulations are intended to further the following urban design features stated in the plan:

- ◆ Pedestrian pathways from the surrounding residential areas to and through the business district and on to Juanita Beach Park should be acquired and improved.
- ◆ View corridors to the lake should be explored through new development in the business district.
- ◆ Entry features, such as signs or sculpture, should be established in the locations shown in the Juanita Business District Plan.
- ◆ Coordinated streetscape improvements should be used throughout the business district, including street trees, street furniture, and other amenities, like flowers, banners, and signs.

Purpose of the Design Guidelines for the Market Street Corridor, including the Market Street Historic District

The City Council adopted the Market Street Corridor Plan in December of 2006 as part of the Market and Norkirk Neighborhood planning process. The new plan was created for commercial and multifamily properties adjoining Market Street extending from the Central Business District at the south end to 19th Avenue at the north end. The plan includes a vision for the corridor of an attractive, economically healthy area that accommodates neighborhood oriented businesses, office uses and multifamily housing in a way that complements and protects the adjacent residential neighborhoods.

The historic 1890's buildings at the intersection of Market Street and 7th Avenue create a unique sense of place that represents the original town center of Kirkland. The plan establishes an historic district in this area that will reflect the City's past through both its old and new buildings and its streetscape. New development and renovation within

Purpose of the Design Guidelines for PLA5C

Planned Area 5C is part of the Moss Bay Neighborhood and is designated for high density residential and office uses. It is located just east of the Central Business District (CBD) and shares many of the CBD's characteristics, although retail uses are not allowed.

The adjacent steep hillside to the north of PLA5C is part of the 85th Street right-of-way and it limits potential view obstruction from the five to six story buildings which can be developed in PLA5C.

The following guidelines, which encourage wide sidewalks, do not apply to PLA5C since there are no "pedestrian oriented streets" or "major pedestrian sidewalks" designated in the Zoning Code for this area.

- Sidewalk Width: Movement Zone
- Sidewalk Width: Storefront Activity Zone

An additional guideline that does not apply is "Height Measurement on Hillsides"
