#### ORDINANCE 0-4413

AN ORDINANCE OF THE CITY OF KIRKLAND RELATING TO ZONING, AND LAND USE; AMENDING ZONING PROVISIONS RELATING TO COMMERCIAL USES AND ZONES; AMENDING THE FOLLOWING CHAPTERS OF THE KIRKLAND ZONING ORDINANCE 3719, AS AMENDED: 25, 27, 40, 45, 47, 48, 50, 51, 52, 53, 54, 55, 56, 60, 105, AND 142; AND APPROVING A SUMMARY ORDINANCE FOR PUBLICATION, FILE NO. CAM13-00185.

WHEREAS, the City Council has received a recommendation from the Kirkland Planning Commission to amend certain sections of the text of the Kirkland Zoning Code, Ordinance 3719, as amended, as set forth in the report and recommendation of the Planning Commission dated June 7, 2013; and bearing Kirkland Department of Planning and Community Development File No.; CAM13-00185 and

WHEREAS, prior to making the recommendation, the Kirkland Planning Commission, following notice as required by RCW 35A.63.070, on May 23, 2013, held a public hearing on the amendment proposals and considered the comments received at the hearing; and

WHEREAS, on May 6, 2013, draft regulations were forwarded to the Washington State Department of Commerce for review, as required by RCW 36.70A.106; and

WHEREAS, pursuant to the State Environmental Policy Act (SEPA), there has accompanied the legislative proposal and recommendation through the entire consideration process, a SEPA Addendum to Existing Environmental Documents issued by the responsible official pursuant to WAC 197-11-600 and WAC 197-11-625; and

WHEREAS, in regular public meeting the City Council considered the environmental documents received from the responsible official, together with the report and recommendation of the Planning Commission; and.

NOW THEREFORE, the City Council of the City of Kirkland do ordain as follows:

<u>Section 1</u>. Zoning text amended: The following specified sections of the text of Ordinance No. 3719, as amended, the Kirkland Zoning Ordinance, are amended as set forth in Attachment A attached to this Ordinance and incorporated by reference.

Section 2. If any section, subsection, sentence, clause, phrase, part or portion of this Ordinance, including those parts adopted by reference, is for any reason held to be invalid or unconstitutional by any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions of this Ordinance.

<u>Section 3.</u> To the extent the subject matter of this ordinance, pursuant to Ordinance 2001, is subject to the disapproval jurisdiction of the Houghton Community Council, this ordinance shall become effective within the Houghton Community Municipal Corporation only upon approval of the Houghton Community Council or the failure of said Community Council to disapprove this ordinance within 60 days of the date of the passage of this ordinance.

Section 4. This Ordinance shall be in full force and effect on September 1, 2013 and after its passage by the City Council and publication pursuant to Kirkland Municipal Code 1.08.017, in the summary form attached to the original of this Ordinance and by this reference approved by the City Council.

Passed by majority vote of the Kirkland City Council in open meeting this 2nd day of July, 2013.

Signed in authentication thereof this 2nd day of July, 2013.

MAYOR

Attest:

Approved as to Form:

City Attorney

## **KZC Text Amendments File No. CAM13-00185**

#### 45.08 (BC Zone), General Regulation 9:

- 9. Maximum height of structure is as follows:
  - a. In the BC zone, if adjoining a low density zone other than RSX, then 25 feet above average building elevation. Otherwise, 30 feet above average building elevation. Except if adjoining a low density zone, structure height may be increased above 30 feet in height through a Process IIA, Chapter 150 KZC, if:
  - 1) It will not block local or territorial views designated in the Comprehensive Plan;
  - 2) The increased-height is not specifically inconsistent with the applicable neighborhood plan provisions of the Comprehensive Plan; and
  - 3) The required front yard of any portion of the structure is increased one foot for each foot that any portion of the structure exceeds 30 feet above average building elevation (does not apply to Public Park uses).
  - b. In the BC 1 zone, 35 feet above average building elevation.
  - c. In the BC 2 zone, 35 feet above average building elevation. Structure height may be increased to 60 feet in height if:
    - 1) At least 50 percent of the floor area is residential;
    - 2) Parking is located away from the street by placing it behind buildings, to the side of buildings, or in a parking structure;
    - 3) The ground floor is a minimum 15 feet in height for all retail, restaurant, or office uses (except parking garages); and
    - 4) The required yards of any portion of the structure are increased one foot for each foot that any portion of the structure exceeds 30 feet above average building elevation (does not apply to Public Park uses).

#### 47.08 (BCX Zone), General Regulation 4:

- 4: Except if adjoining a low density zone, structure height may be increased above 33 feet in height through a Process IIA, Chapter 150 KZC if:
  - a. It will not block local or territorial views designated in the Comprehensive Plan; and
  - b. The increased height is not specifically inconsistent with the applicable neighborhood plan provisions of the Comprehensive Plan.

(Does not apply to Public Park and Automotive Service Center-uses).

(Renumber general regulations accordingly)

#### 48.10 (LIT Zone), General Regulation 3:

- 3. Except if adjoining a low-density zone, structure height-may be increased above 35-feet in height through a Process IIA, Chapter 150 K2C, if:
- a. It will not block local or territorial views designated in the Comprehensive Plan;
- b. The increased height is not specifically inconsistent with the applicable neighborhood plan provisions of the Comprehensive Plan; and
- c. The required yard of any portion of the structure may be increased up to a maximum of one foot for each foot that any portion of the structure exceeds 35 feet above average building elevation. The need for additional setback yards will be determined as part of the review of any request to increase structure height.

(Does not apply to Hazardous Waste Treatment and Storage Facilities and Public Parks uses).

(Renumber general regulations accordingly)

#### 60.85 (PLA 6G Zone), General Regulation 5:

- 5. Except if adjoining a low density zone, structure height may be increased above 35 feet in height through a Process IIA, Chapter 150 KZC, if:
- a. It will not block local or territorial views designated in the Comprehensive Plan;
- b. The increased height is not specifically inconsistent with the applicable neighborhood plan provisions of the Comprehensive Plan; and
- c. The need for additional setback yards to compensate for the added height and bulk will be determined as part of the review of any request to increase structure height.
- (Does not apply to Detached, Attached or Stacked Dwelling Units, Assisted Living Facility and Public Park uses).

(Renumber general regulations accordingly)

# 50.47.120 (CBD 7 Zone), Special Regulation 1: 50.47.125 (CBD 7 Zone), Special Regulation 1:

1. This use may be located on the street level floor of a building only if there is a retail space extending a minimum of 30 feet of the building depth between this use and the abutting right-of-way. The Planning Director may approve a reduction to the depth requirement for the retail space if the applicant demonstrates that the proposed configuration of the retail use provides an adequate dimension for a viable retail tenant and provides equivalent or superior visual interest and potential foot traffic as would compliance with the required dimension. This special regulation shall not apply on Fourth Avenue.

#### 105.60 Parking Area Design – General

#### 105.60 Parking Area Design — General

- The minimum dimensions for parking spaces and parking areas are displayed in plates in Chapter 180
  KZC. These plates apply to parking for all uses except detached dwelling units. Columns may encroach a maximum of six inches into the specified minimum dimensions for parking stall width provided:
  - a. The columns are set back at least two feet from the required parking aisle so as not to encumber vehicles turning into the stall, and
  - b. The columns are not within the center eight feet of the specified minimum dimensions for parking stall length so as to not interfere with opening of vehicle doors of parked cars.
- 2. Driveways which are not driving aisles within a parking area shall be a minimum width of 20 feet.
- 3. Parking areas must be constructed so that car wheels are kept at least two (2) feet from pedestrian and landscape areas; provided, that parking areas may be constructed in a manner which allows vehicles to overhang a pedestrian or landscape area by up to two (2) feet if the pedestrian or landscape area within the area of vehicle overhang is not required by this or any other code (see Figure 105.60.A).
- 4. Shared parking lot entrances and driveways between properties shall be installed whenever feasible as determined by the Planning Official.
- 5. Parking areas must have adequate lighting. Lights in parking lots must be nonglare and must be mounted no more than 20 feet above the ground.

#### 105.103 Modifications

- 1. General The provisions of this section establish under what circumstances the requirements of this chapter may be modified.
- 2. Authority to Grant and Duration

- a. If the proposed development of the subject property requires approval through Process I, IIA, or IIB, described in Chapters 145, 150 and 152 KZC, respectively, a request for a modification will be considered as part of that process under the provisions of this section. The City must find that the applicant meets the criteria listed below in subsection (3) of this section. If granted under Process I, IIA, or IIB, the modification is binding on the City for all development permits issued for that development under the Building Code within five (5) years of the granting of the modification.
- b. For projects requiring Design Review described in Chapter 142 KZC, a request to modify the requirements in KZC 105.18 or 105.19 will be considered as part of the Design Review process. The Design Review Board must find that the applicant meets the criteria listed below in subsection (3)(b) of this section.
- c. If subsection (2)(a) and/or (2)(b) of this section does not apply, the Planning Official may grant a modification in writing under the provisions of this section.
- 3. Modifications A modification to improvement requirements of this chapter may be required or granted if the applicant demonstrates on submitted plans and/or in writing that the following criteria have been met for modifications to the applicable sections:
  - a. For a modification to KZC 105.10 for vehicular access easements or tracts and for KZC 105.60.2, 105.60.3, and 105.97 for parking area design, the requirements may be modified if:
    - The modifications will not affect the ability to provide any property with police, fire, emergency medical, or other essential services; and
    - 2) One (1) of the following requirements is met:
      - a) The modification is necessary because of a preexisting physical condition; or
      - b) The modification will produce a site design superior to that which would result from adherence to the adopted standard.
    - 3) Exception: KZC 105.10(2)(g) relating to screening for access easements or tracts will use the modification criteria for buffering in subsection (3)(g) of this section.
  - b. For a modification to KZC 105.18 or 105.19 the requirements for pedestrian access may be modified if:
    - 1) The modification is necessary because of the size, configuration, topography or location of the subject property;
    - 2) The modification will provide for equal or improved pedestrian and bicycle safety and convenience; and
    - The modification will not have any substantial detrimental effect on nearby properties and the City as a whole.
  - c. For a modification to KZC 105.20 and 105.45, a decrease in the required number of spaces may be granted if the number of spaces proposed is documented by an adequate and thorough parking demand and utilization study to be sufficient to fully serve the use. The study shall be prepared by a licensed transportation engineer or other qualified professional, and shall analyze the operational characteristics of the proposed use which justify a parking reduction. The scope of the study shall be proposed by the transportation engineer and approved by the City traffic engineer. The study shall provide at least two (2) days of data for morning, afternoon and evening hours, or as otherwise approved or required by the City traffic engineer. Approval of a parking reduction shall be solely at the discretion of the City. A decrease in the minimum required number of spaces may be based in whole or part on the provision of nationally accepted TDM (transportation demand management) measures. Data supporting the effectiveness of the TDM measures shall be provided as part of the parking demand and utilization study and approved by the City traffic engineer.

The Planning Official shall not approve or deny a modification to decrease the number of parking spaces without first providing notice of the modification request to the owners and residents of property within 300 feet of the subject property and providing opportunity for comment. The Planning Official shall use mailing labels provided by the applicant, or, at the discretion of the Planning Official, by the City. Said comment period shall not be less than seven (7) calendar days.

- d. For a modification to KZC 105.40, the requirements for parking area location may be modified if:
  - 1) The proposed parking area will have no adverse impacts on adjacent properties;
  - 2) It is reasonable to expect that the proposed parking area will be used by the subject use; and
  - A safe pedestrian and/or shuttle connection exists, or will be created, between the subject use and the proposed parking area.
- e. For a modification to the landscape requirements for parking and driving areas, see Chapter 95
  KZC.
- f. For a modification to 105.60.1 for parking area design, the requirements may be modified if the reduced dimensions are supported by an adequate and thorough parking design and operational study demonstrating functional and user-friendly parking operations. The study shall be prepared by a licensed transportation engineer or other qualified professional and shall analyze the operational characteristics of the proposed parking, including parking maneuvers, queuing, turnover frequency, safety, and traffic volumes. The scope of the study shall be proposed by the transportation engineer and approved by the City traffic engineer. Approval of reduced dimensions shall be solely at the discretion of the City.
- fg. For a modification to KZC 105.77, the curbing requirement for parking areas and driveways may be modified if:
  - 1) The modification would result in superior landscaping and/or increased retention of significant natural vegetation;
  - 2) The modification will not result in increased hazards for pedestrians or vehicles; and
  - 3) The modification will not result in increased erosion of unpaved areas onto the parking area, driveway, or rights-of-way.
- gh. See Chapter 95 KZC for a modification of the buffering requirements for parking and driving areas. For a modification to KZC 105.10(2)(g), the screening requirements for access easements or tracts may be modified if:
  - The existing topography of or adjacent to the subject property decreases or eliminates the need for visual screening; or
  - 2) The modification will be of more benefit to the adjoining property by causing less impairment of view or sunlight; or
  - The modification will provide a visual screen that is comparable or superior to the buffer required by KZC 105.10(2)(g).
- hi. For a modification to KZC 105.100, the surface material requirement for parking areas and driveways may be modified if:
  - 1) The surfacing material will not enter into the drainage system, or onto public or other private property; and
  - 2) The material will provide a parking surface which is usable on a year-round basis.

#### 142.40 Appeals of Design Review Board Decisions

- 11. Decision on the Appeal
  - a. Criteria Unless substantial relevant information is presented which was not considered by the Design Review Board, the decision of the Design Review Board shall be accorded substantial weight. The decision may be reversed or modified if, after considering all of the evidence in light of the <u>authority of the Design Review Board pursuant to 142.35.3-design regulations</u>, design guidelines, and Comprehensive-Plan, the hearing body or officer determines that a mistake has been made. Specific allowances established by the applicable use zone charts may not be appealed unless the Design Review Board has approved exceptions to those allowances.
  - b. General The hearing body or officer shall consider all information and material within the scope of the appeal submitted by the appellant. The hearing body or officer shall adopt findings and conclusions and either:
    - 1) Affirm the decision being appealed; or
    - 2) Reverse the decision being appealed; or
    - 3) Modify the decision being appealed.

- c. Issuance of Written Decision Within eight (8) calendar days after the public hearing, the hearing body or officer shall issue a written decision on the appeal. Within four (4) business days after it is issued, the hearing body or officer shall distribute the decision by mail to the appellant and the applicant.
- d. Effect If the appeal hearing is combined with an open record hearing for a related development permit, the decision on the appeal shall become part of the decision on the related development permit. The final decision of the City on the appeal of the Design Review Board decision shall occur at the same stage as the final decision of the City on the related development permit. Any appeal or challenge of the action of the hearing body or officer on the appeal of the Design Review Board decision shall be limited to the scope of the initial appeal.

51.25 User Guide. The charts in KZC 51.30 contain the basic zoning regulations that apply in the MSC 3 zone of the City. Use these charts by reading down the left hand column entitled Use. Once you locate the use in which you are interested, read across to find the regulations that apply to that use.

#### Section 51.28

#### Section 51.28 - GENERAL REGULATIONS

The following regulations apply to all uses in this zone unless otherwise noted:

- 1. Refer to Chapter 1 KZC to determine what other provisions of this code may apply to the subject property.
- 2. If any portion of a structure is adjoining a low density zone, then either:
  - a. The height of that portion of the structure shall not exceed 15 feet above average building elevation; or
  - b. The maximum horizontal facade shall not exceed 50 feet in width.

See KZC 115.30, Distance Between Structures/Adjacency to Institutional Use, for further details.

- Some development standards or design regulations may be modified as part of the design review process. See Chapters 92 and 142 KZC for requirements.
- 4. At least 75 percent of the total gross floor-area located on the ground floor of all structures on the subject property must contain retail establishments, restaurants, taverns, hotels or motels, or offices. These uses shall be oriented to an adjacent arterial, a major pedestrian sidewalk,—a through block pedestrian pathway or an internal pathway.—
- 4. The following commercial frontage requirements shall apply to all development that includes dwelling units or assisted living uses:
- a. The street level floor of all buildings shall be limited to one or more of the following uses: Retail; Restaurant or Tavern; Hotel or Motel; Entertainment, Cultural and/or Recreational Facility; or Office. These uses shall be oriented toward Market Street and have a minimum depth of 20 feet and an average depth of at least 30 feet (as measured from the face of the building along the street).
- The Design Review Board (or Planning Director if not subject to D.R.) may approve a minor reduction in the depth requirements if the applicant demonstrates that the requirement is not feasible given the configuration of existing or proposed improvements and that the design of the commercial frontage will maximize visual interest. The Design Review Board (or Planning Director if not subject to D.R.) may modify the frontage requirement where the property abuts residential zones in order to create a more effective transition between uses.
- b. The commercial floor shall be a minimum of 13 feet in height. The height of the structure may exceed the maximum height of structure by three feet for a three story building with the required 13 foot commercial floor.
- c. Other uses allowed in this zone and parking shall not be located on the street level floor unless an intervening commercial frontage is provided between the street and those other uses or parking subject to the standards above. Lobbies for residential or assisted living uses may be allowed within the commercial frontage provided they do not exceed 20 percent of the building's linear commercial frontage along the street.
- 5. Surface parking areas shall not be located between the street and building unless no feasible alternative exists. Parking areas located to the side of the building are allowed provided that the parking area and vehicular access occupies less than 30 percent of the property frontage and design techniques adequately minimize the visibility of the parking.

54.02 User Guide. The charts in KZC 54.06 contain the basic zoning regulations that apply in the NRHBD 1A zone of the City. Use these charts by reading down the left hand column entitled Use. Once you locate the use in which you are interested, read across to find the regulations that apply to that use.

#### Section 54.04

#### Section 54.04 - GENERAL REGULATIONS

The following regulations apply to all uses in this zone unless otherwise noted:

- 1. Refer to Chapter 1 KZC to determine what other provisions of this code may apply to the subject property.
- 2. In cases where the height of a structure is specified in number of stories, the following applies:
  - a. Height measured at the midpoint of the frontage of the subject property on the abutting right-of-way. If the site abuts more than one right-of-way, the applicant may select the right-of-way from which to measure.
  - b. The following heights per story are allowed:
    - i. Ground floor retail; ground floor restaurant and tavern; ground floor entertainment/cultural and/or recreational facility shall be a minimum of 13 feet in height and a maximum of 15 feet.
    - ii. Office; private club or lodge; church; school; day-care center; public utility, government facility, or community facility; public park, ground floor hotel or motel; retail above the ground floor shall be a maximum of 13 feet.
    - iii. Residential; hotel or motel above the ground floor shall be a maximum of 10 feet.
  - c. To determine the allowed height of a structure, determine the number of stories allowed in the use zone charts and apply the allowed height per story specified in subsection (2)(b) of this section. For example, if three stories are allowed and the proposed use is ground floor retail with two stories of residential above, the allowed height would be 35 feet.
  - d. Height shall be measured above the point of measurement (e.g., above average building elevation, or above right-of-way) as specified in the particular use zone charts. For purposes of measuring building height above the abutting right(s)-of-way, alleys shall be excluded.
  - e. In addition to the height exceptions established by KZC 115.60, the following exceptions to height regulations in NRHBD zones are established:
    - i. Decorative parapets may exceed the height limit by a maximum of four feet; provided, that the average height of the parapet around the perimeter of the structure shall not exceed two feet.
    - ii. For structures with a peaked roof, the peak may extend eight feet above the height limit if the slope of the roof is equal or greater than four feet vertical to 12 feet horizontal.
- 3. The minimum required front yard is 10 feet, unless otherwise prescribed in the use zone chart. Ground floor canopies and similar entry features may encroach into the front yard; provided, the total horizontal dimension of such elements may not exceed 25 percent of the length of the structure. No parking may encroach into the required 10-foot front yard.
- 4. A pedestrian connection should be developed to link Slater Avenue NE with NE 116th Street.
- 5. The following commercial frontage requirements shall apply to all development that includes dwelling units or assisted living uses:
- a. The street level floor of all buildings shall be limited to one or more of the following uses: Retail; Restaurant or Tavern; Hotel or Motel; Entertainment, Cultural and/or Recreational Facility; or Office. These uses shall be oriented toward Market Street and have a minimum depth of 20 feet and an average depth of at least 30 feet (as measured from the face of the building along the street).

The Design Review Board (or Planning Director if not subject to D.R.) may approve a minor reduction in the depth requirements if the applicant demonstrates that the requirement is not feasible given the configuration of existing or proposed improvements and that the design of the commercial frontage will maximize visual interest.

b. Other uses allowed in this zone and parking shall not be located on the street level floor unless an intervening commercial frontage is provided between the street and those other uses or parking subject to the standards above. Lobbies for residential or assisted living uses may be allowed within the commercial frontage provided they

do not exceed 20 percent of the building's linear commercial frontage along the street.

54.08 User Guide. The charts in KZC 54.12 contain the basic zoning regulations that apply in the NRHBD 1B zone of the City. Use these charts by reading down the left hand column entitled Use. Once you locate the use in which you are interested, read across to find the regulations that apply to that use.

#### Section 54.10

Section 54.10 - GENERAL REGULATIONS

The following regulations apply to all uses in this zone unless otherwise noted:

- 1. Refer to Chapter 1 KZC to determine what other provision of this code may apply to the subject property.
- 2. In cases where the height of a structure is specified in number of stories, the following applies:
  - a. Height measured at the midpoint of the frontage of the subject property on the abutting right-of-way. If the site abuts more than one right-of-way, the applicant may select the right-of-way from which to measure.
  - b. The following heights per story are allowed:
    - i. Ground floor retail; ground floor restaurant and tavern; ground floor entertainment/cultural and/or recreational facility shall be a minimum of 13 feet in height and a maximum of 15 feet.
    - ii. Office; private club or lodge; church; school; day-care center; public utility, government facility, or community facility; public park, ground floor hotel or motel; retail above the ground floor shall be a maximum of 13 feet.
    - iii. Residential; hotel or motel above the ground floor shall be a maximum of 10 feet.
  - c. To determine the allowed height of a structure, determine the number of stories allowed in the use zone charts and apply the allowed height per story specified in subsection (2)(b) of this section. For example, if three stories are allowed and the proposed use is ground floor retail with two stories of residential above, the allowed height would be 35 feet.
  - d. Height shall be measured above the point of measurement (e.g., above average building elevation, or above right-of-way) as specified in the particular use zone charts. For purposes of measuring building height above the abutting right(s)-of-way, alleys shall be excluded.
  - e. In addition to the height exceptions established by KZC 115.60, the following exceptions to height regulations in NRHBD zones are established:
    - i. Decorative parapets may exceed the height limit by a maximum of four feet; provided, that the average height of the parapet around the perimeter of the structure shall not exceed two feet.
    - ii. For structures with a peaked roof, the peak may extend eight feet above the height limit if the slope of the roof is equal or greater than four feet vertical to 12 feet horizontal.
- 3. If any portion of a structure is adjoining a low density zone, then either:
  - a. The height of that portion of the structure shall not exceed 15 feet above average building elevation, or
  - b. The maximum horizontal facade shall not exceed 50 feet in width.
  - See KZC 115.30, Distance Between Structures/Adjacency to Institutional Use, for further details. (Does not apply to Detached Dwelling Units uses).
- 4. The minimum required front yard is 10 feet, unless otherwise prescribed in the use zone chart. Ground floor canopies and similar entry features may encroach into the front yard; provided, the total horizontal dimension of such elements may not exceed 25 percent of the length of the structure. No parking may encroach into the required 10-foot front yard.
- 5. The following commercial frontage requirements shall apply to all development that includes dwelling units or assisted living uses:
- a. The street level floor of all buildings shall be limited to one or more of the following uses: Retail; Restaurant or Tavern; Hotel or Motel; Entertainment, Cultural and/or Recreational Facility; or Office. These uses shall be oriented toward Market Street and have a minimum depth of 20 feet and an average depth of at least 30 feet (as measured from the face of the building along the street).

The Design Review Board (or Planning Director if not subject to D.R.) may approve a minor reduction in the depth requirements if the applicant demonstrates that the requirement is not feasible given the configuration of existing or proposed improvements and that the design of the commercial frontage will maximize visual interest. b. Other uses allowed in this zone and parking shall not be located on the street level floor unless an intervening commercial frontage is provided between the street and those other uses or parking subject to the standards above. Lobbies for residential or assisted living uses may be allowed within the commercial frontage provided they do not exceed 20 percent of the building's linear commercial frontage along the street.

#### PUBLICATION SUMMARY OF ORDINANCE 0-4413

AN ORDINANCE OF THE CITY OF KIRKLAND RELATING TO ZONING, AND LAND USE; AMENDING ZONING PROVISIONS RELATING TO COMMERCIAL USES AND ZONES; AMENDING THE FOLLOWING CHAPTERS OF THE KIRKLAND ZONING ORDINANCE 3719, AS AMENDED: 25, 27, 40, 45, 47, 48, 50, 51, 52, 53, 54, 55, 56, 60, 105, AND 142; AND APPROVING A SUMMARY ORDINANCE FOR PUBLICATION, FILE NO. CAM13-00185.

<u>SECTION 1</u>. Amends numerous sections of the Kirkland Zoning Code relating to commercial uses and zones.

SECTION 2. Provides a severability clause for the Ordinance.

SECTION 3. Establishes that this ordinance, to the extent it is subject to disapproval jurisdiction, will be effective within the disapproval jurisdiction of the Houghton Community Council Municipal Corporation upon approval by the Houghton Community Council or the failure of said Community Council to disapprove this ordinance within 60 days of the date of the passage of this ordinance.

SECTION 4. Authorizes publication of the Ordinance by summary, which summary is approved by the City Council pursuant to Section 1.08.017 Kirkland Municipal Code and establishes the effective date as five days after publication of summary.

The full text of this Ordinance will be mailed without charge to any person upon request made to the City Clerk for the City of Kirkland. The Ordinance was passed by the Kirkland City Council at its meeting on the 2nd day of July, 2013.

I certify that the foregoing is a summary of Ordinance O-4413 approved by the Kirkland City Council for summary publication.

City Clerk
