

ORDINANCE 4004

AN ORDINANCE OF THE CITY OF KIRKLAND RELATING TO MODIFICATIONS TO TITLE 21 OF THE KIRKLAND MUNICIPAL CODE REGARDING BUILDING AND CONSTRUCTION.

The City Council of the City of Kirkland do ordain as follows:

Section 1. Section 21.06.255 of the Kirkland Municipal Code is hereby amended as follows:

**21.06.255 Expiration.**

(a) Every permit issued shall expire one year from the date of issuance. The building official is authorized to approve a request for an extended expiration date where a construction schedule is provided by the applicant and approved prior to permit issuance.

(b) Every permit which has been expired for less than one year may be renewed for a period of one year for an additional fee as long as no changes have been made to the originally approved plans. For permits that have been expired for longer than one year, a new permit must be obtained and full new fees paid. No permit shall be renewed more than once.

(c) Electrical, mechanical and plumbing permits shall expire at the same time as the associated building permit except that if no associated building permit is issued, the electrical, mechanical and/or plumbing permit shall expire one hundred eighty days from issuance.

Section 2. Chapter 21.06 of the Kirkland Municipal Code is hereby amended by the addition of a new Section 21.06.572 to read as follows:

**21.06.572 – Limitations on Authority.**

An application for appeal shall be based on a claim that the true intent of this code, the technical codes or the rules legally adopted thereunder have been incorrectly interpreted, the provisions of this code or the technical codes do not fully apply or an equally good or better form of construction, method of protection or safety is proposed. The board shall have no authority to waive requirements of this code.

Section 3. Section 21.08.070 of the Kirkland Municipal Code is hereby repealed.

Section 4. Section 21.08.075 of the Kirkland Municipal Code is hereby amended to read as follows:

**21.08.075 IBC Chapter 31 amended.**

Chapter 31 of the IBC is amended and supplemented with the addition of a new Section 3110 to read as follows:

Section 3110 OVERWATER STRUCTURES, PIERS, WHARVES, AND BUILDINGS

IBC 3110.1 – General. Overwater structures, piers, wharves and buildings shall comply with the requirements of this sections and other applicable sections of this code.

IBC 3110.2 - Definitions

OVERWATER STRUCTURES. For the purpose of this Chapter, overwater structures shall include all structures which have twenty percent (20%) or more of their area over water, or a structure which has 8,000 square feet over water.

DOCK. A dock is a natural open or artificially closed basin in which vessels may remain afloat when berthed at a wharf or pier.

PIER. A pier is a structure, usually of greater length than width, of timber, stone, concrete or other material having a deck, and projecting from the shore into navigable waters so that vessels may be moored alongside for loading and unloading or for storage or repairs.

SUBSTRUCTURE. The substructure is that portion of the construction below and including the deck.

SUPERSTRUCTURE. The superstructure is that portion of the construction above the deck.

WHARF OR QUAY. A wharf or quay is a structure of timber, stone, concrete or other material having a platform built along and parallel to navigable waters so that vessels may be moored alongside for loading and unloading, or for storage or repair.

IBC Section 3110.3 Structures over water.

No portion of any building or other structure supported by piers or piling and extending over water shall be more than two hundred fifty feet from an improved public street or alley giving access thereto for fire engines and other firefighting equipment; provided, however, that the foregoing limitation shall not apply to any one-story structure used solely for the moorage of boats and:

- (1) Of type 1 construction; or

(2) Of type 2 construction; or

(3) Having installed throughout the structure an approved automatic sprinkler system.

IBC Section 3110.4 Substructure.

1. Draft Stops. Draft stops shall be installed in all substructures constructed of combustible materials, exclusive of piling and pile bracing. They shall be placed not over one hundred feet (100') apart measured along the main axis of the pier or wharf. They shall fit tightly around all joists, beams, etc. and extend from the underside of the deck to low water with a maximum required depth of 6 feet.

EXCEPTION: Private docks which serve a single family dwelling unit.

Substructure draft stops shall be constructed of not less than two (2) thicknesses of 2" nominal thickness lumber laid with broken joints or materials of equal fire resistance.

2. Automatic Sprinklers. Automatic sprinklers shall be installed under the substructure of every overwater structure in accordance with the requirements of Chapter 9.

EXCEPTIONS: Automatic sprinklers are not required under the following categories of substructure:

- a. Combustible substructures having superstructures of 120 square feet or less in area.
- b. Noncombustible substructures with or without superstructures.
- c. Substructures resulting from walkways or finger piers when width does not exceed 10 feet.

3. Dry Standpipes. When a distance of travel to fire apparatus access exceeds two hundred fifty (250) feet, an approved minimum four (4) inch dry standpipe with two and one-half (2-1/2) inch outlets at a maximum of one hundred (100) feet on center shall be provided. There shall be a Siamese connection at the shore end and direct access for Fire Department pumping apparatus shall be provided. Standards for installation to be set by the Director of Fire Services.

Exception: Piers serving no more than one single-family dwelling.

Section 5. Chapter 21.08 of the Kirkland Municipal Code is hereby amended by the addition of a new Section 21.08.077 to read as follows:

**21.08.077 IBC Chapter 32 amended.**

Chapter 32 of the IBC is amended to read as follows:

**3202.3 Encroachments 8 feet or more above grade.**

Encroachments 8 feet (2438 mm) or more above grade shall comply with Sections 3202.3.1 through 3202.3.4 3.

~~**3202.3.3 Encroachments 15 feet or more above grade.**~~

~~Encroachments 15 feet (4572 mm) or more above grade shall not be limited.~~

**3202.3.4 3 Pedestrian walkways.**

The installation of a pedestrian walkway over a public right-of-way shall be subject to the approval of the local authority having jurisdiction. The vertical clearance from the public right-of-way to the lowest part of a pedestrian walkway shall be 15 feet (4572 mm) minimum.

Section 6. Section 21.20.030 of the Kirkland Municipal Code is hereby amended to read as follows:

**21.20.030 IFC Section 105.7.5 amended.**

Section 105.7.5 of the International Fire Code is amended to read as follows:

~~105.7.5 Permit Required - Underground Combustible Liquid Tank.~~

~~A permit is not required for the abandonment or removal of underground storage tanks previously used to store fuel oil for residential heating. It is the property owner's responsibility to make the decision on how to proceed with abatement.~~

105.7.5 Flammable and combustible liquids.

A construction permit is required:

1. To repair or modify a pipeline for the transportation of flammable or combustible liquids.
2. To install, construct or alter tank vehicles, equipment, tanks, plants, terminals, wells, fuel-dispensing stations, refineries, distilleries and similar

facilities where flammable and combustible liquids are produced, processed, transported, stored, dispensed or used.

3. To install, alter, remove, abandon or otherwise dispose of a flammable or combustible liquid tank.

**Exception:** A permit is not required for the abandonment or removal of underground storage tanks previously used to store fuel oil for residential heating. It is the property owner's responsibility to make the decision on how to proceed with abatement

Section 7. Chapter 21.20 of the Kirkland Municipal Code is hereby amended by the addition of a new Section 21.20.037 to read as follows:

**21.20.037 IFC Section 109.3 amended.**

Section 109.3 of the International Fire Code is amended to read as follows:

109.3 Violation penalties. Persons who shall violate a provision of this code or shall fail to comply with any of the requirements thereof or who shall erect, install, alter, repair or do work in violation of the approved construction documents or directive of the fire code official, or of a permit or certificate used under provisions of this code, shall be guilty of a misdemeanor, punishable by a fine of not more than \$1,000 dollars or by imprisonment not exceeding 90 days, or both such fine and imprisonment. Each day that a violation continues after due notice has been served shall be deemed a separate offense.

Section 8. Kirkland Municipal Code Section 21.20.085 is hereby repealed.

Section 9. Section 21.56.020 of the Kirkland Municipal Code is hereby amended to read as follows:

**21.56.020 Definitions.**

Unless specifically defined below, words or phrases used in this chapter shall be interpreted so as to give them the meaning they have in common usage and to give this chapter its most reasonable application.

(1) "Appeal" means a request for a review of the building official's interpretation of any provision of this chapter or a request for a variance.

(2) "Area of shallow flooding" means a designated AO or AH zone on the flood insurance rate map (FIRM). The base flood depths range from one to three feet; a clearly defined channel does not exist; the path of flooding is

unpredictable and indeterminate; and, velocity flow may be evident. AO is characterized as sheet flow and AH indicates ponding.

(3) "Area of special flood hazard" means the land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year. Designation on maps always includes the letters A or V.

(4) "Base flood" means the flood having a one percent chance of being equalled or exceeded in any given year. Also referred to as the "one-hundred-year flood." Designation on maps always includes the letters A or V.

(5) "Basement": means any area of the building having its floor sub-grade (below ground level) on all sides.

(~~5~~ 6) "Critical facility" means a facility for which even a slight chance of flooding might be too great. Critical facilities include but are not limited to schools, nursing homes, hospitals, police, fire and emergency response installations and installations which produce, use or store hazardous materials or hazardous waste.

(6 7) "Development" means any manmade change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations or storage of equipment located within the area of special flood hazard.

(7 8) "Flood" or "flooding" means a general and temporary condition of partial or complete inundation of normally dry land areas from:

(A) The overflow of inland or tidal waters; and/or

(B) The unusual and rapid accumulation of runoff of surface waters from any source.

(8 9) "Flood insurance rate map (FIRM)" means the official map on which the Federal Insurance Administration has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

(9 10) "Flood insurance study" means the official report provided by the Federal Insurance Administration that includes flood profiles, the flood boundary-floodway map, and the water surface elevation of the base flood.

(~~10~~ 11) "Floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot.

(11 12) "Lowest floor" means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood-resistant enclosure, usable solely for parking of vehicles, building access or storage, in an area other than a basement area, is not considered a building's lowest floor, provided that such enclosure is not built so as to render the structure in violation of the applicable nonelevation design requirements of this chapter found at Section 21.56.090(1)(B).

(~~12~~ 13) "Manufactured home" means a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when connected to the required utilities. For floodplain management purposes the term "manufactured home"

also includes park trailers, travel trailers, and other similar vehicles placed on a site for greater than one hundred eighty consecutive days. For insurance purposes the term "manufactured home" does not include park trailers, travel trailers, and other similar vehicles.

~~(13~~ 14) "Manufactured home park or subdivision" means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

~~(14~~ 15) "New construction" means structures for which the "start of construction" commenced on or after the effective date of the ordinance codified in this chapter.

(16) "Recreational Vehicle" means a vehicle

- 1) Built on a single chassis;
- 2) 400 square feet or less when measured at the largest horizontal projection;
- 3) Designed to be self-propelled or permanently towable by a light duty truck; and
- 4) Designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational camping, travel or seasonal use.

~~(15~~ 17) "Start of construction" includes substantial improvement, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, placement or other improvement was within one hundred eighty days of the permit date. The actual start means either the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundation or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure.

~~(16-18)~~ "Structure" means a walled and roofed building including a gas or liquid storage tank that is primarily above ground.

~~(17~~ 19) "Substantial improvement" means any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds fifty percent of the market value of the structure either:

(A) Before the improvement or repair is started; or

(B) If the structure has been damaged and is being restored, before the damage occurred. For the purposes of this definition "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure.

The term does not, however, include either:

(i) Any project for improvement of a structure to comply with existing state or local health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions; or

(ii) Any alteration of a structure listed on the National Register of Historic Places or a State Inventory of Historic Places.

(18 20) "Water dependent" means a structure for commerce or industry which cannot exist in any other location and is dependent on the water by reason of the intrinsic nature of its operations.

(19 21) "Variance" means a grant of relief from the requirements of this chapter which permits construction in a manner that would otherwise be prohibited by this chapter.

Section 10. Section 21.56.030 of the Kirkland Municipal Code is hereby amended to read as follows:

**21.56.030 Basis for establishing the areas of special flood hazard.**

The areas of special flood hazard identified by the Federal Insurance Administration in a scientific and engineering report entitled "The Flood Insurance Study for the City of Kirkland" dated September 30, 1993, having an effective date of May 16, 1995, and any revisions thereto with accompanying flood insurance maps is adopted by reference and declared to be a part of this chapter. The flood insurance study is on file at City Hall, 123 Fifth Avenue, Kirkland, WA 98033.

Section 11. Section 21.56.085 of the Kirkland Municipal Code is hereby amended to read as follows:

**21.56.085 Provisions for flood hazard reduction—General standards.**

In all areas of special flood hazards, the following standards are required:

(1) Anchoring.

(A) All new construction and substantial improvements shall be anchored to prevent flotation, collapse, or lateral movement of the structure.

(B) All manufactured homes must likewise be anchored to prevent flotation, collapse or lateral movement, and shall be installed using methods and practices that minimize flood damage. Anchoring methods may include, but are not limited to, use of over-the-top or frame ties to ground anchors. ~~(Reference FEMA's "Manufactured Home Installation in Flood Hazard Areas" for guidebook for additional techniques. For more detailed information, refer to~~ guidebook FEMA-85 "Manufactured Home Installation in Flood Hazard Areas")

(2) Construction Materials and Methods.

(A) All new construction and substantial improvements shall be constructed with materials and utility equipment resistant to flood damage.

(B) All new construction and substantial improvements shall be constructed using methods and practices that minimize flood damage.

(C) Electrical, heating, ventilation, plumbing, and air-conditioning equipment and other service facilities shall be designed and/or otherwise elevated or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

(3) Utilities.

(A) All new and replacement water supply systems shall be designed to minimize or eliminate infiltration of floodwaters into the system.

(B) New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of floodwaters into the systems and discharge from the systems into floodwaters.

(C) On-site waste disposal systems shall be located to avoid impairment to them or contamination from them during flooding.

(4) Subdivision Proposals.

(A) All subdivision proposals shall be consistent with the need to minimize flood damage.

(B) All subdivision proposals shall have public utilities and facilities such as sewer, gas, electrical, and water systems located and constructed to minimize flood damage.

(C) All subdivision proposals shall have adequate drainage provided to reduce exposure to flood damage.

(D) Where base flood elevation data has not been provided or is not available from another authoritative source, it shall be generated for subdivision proposals and other proposed developments which contain at least fifty lots or five acres (whichever is less).

(5) Review of Building Permits. Where elevation data is not available either through the flood insurance study or from another authoritative source (Section 21.56.070(2)), applications for building permits shall be reviewed to assure that proposed construction will be reasonably safe from flooding. The test of reasonableness is a local judgment and includes use of historical data, high water marks, photographs of past flooding, etc., where available. Failure to elevate at least two feet above grade in these zones may result in higher insurance rates.

Section 12. Section 21.56.090 of the Kirkland Municipal Code is hereby amended to read as follows:

**21.56.090 Provisions for flood hazard reduction—Specific standards.**

In all areas of special flood hazards where base flood elevation data has been provided as set forth in Sections 21.56.030 or 21.56.070(2), the following provisions are required:

(1) Residential Construction.

(A) New construction and substantial improvement of any residential structure shall have the lowest floor, including basement, elevated one foot or more above base flood elevation.

(B) Fully enclosed areas below the lowest floor that are subject to flooding are prohibited, or shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or must meet or exceed the following minimum criteria:

(i) A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.

(ii) The bottom of all openings shall be no higher than one foot above grade.

(iii) Openings may be equipped with screens, louvers, or other coverings or devices; provided, that they permit the automatic entry and exit of floodwaters.

(2) Nonresidential Construction. New construction and substantial improvement of any commercial, industrial or other nonresidential structure shall either have the lowest floor, including basement, elevated one foot or more above the level of the base flood elevation; or, together with attendant utility and sanitary facilities, shall:

(A) Be floodproofed so that below one foot above the base flood level the structure is watertight with walls substantially impermeable to the passage of water;

(B) Have structural components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy;

(C) Be certified by a registered professional engineer or architect that the design and methods of construction are in accordance with accepted standards of practice for meeting provisions of this subsection based on their development and/or review of the structural designs, specifications and plans. Such certification shall be provided to the official as set forth in Section 21.56.070(3)(B);

(D) Nonresidential structures that are elevated, not floodproof, must meet the same standards for space below the lowest floor as described in subsection (1)(B) of this section;

(E) Applicants floodproofing nonresidential buildings shall be notified that flood insurance premiums will be based on rates that are one foot below the floodproofed level (e.g., a building constructed to one foot above the base flood level will be rated as one foot below that level).

(3) Critical Facility. Construction of new critical facilities shall be, to the extent possible, located outside the limits of the base floodplain. Construction of new critical facilities shall be permissible within the base floodplain if no feasible alternative site is available. Critical facilities constructed within the base floodplain shall have the lowest floor elevated to three feet or more above the level of the base flood elevation at the site. Floodproofing and sealing measures must be taken to ensure that toxic substances will not be displaced by or released into floodwaters. Access routes elevated to or above the level of the base floodplain shall be provided to all critical facilities to the extent possible.

(4) **Manufactured Homes.** All manufactured homes to be placed or substantially improved within zones A1-30, AH, and AE shall be elevated on a permanent foundation such that the lowest floor of the manufactured home is one foot or more above the base flood elevation; and be securely anchored to an adequately anchored foundation system in accordance with the provisions of Section 21.56.085(1)(B). ~~This subsection applies to manufactured homes to be placed or substantially improved in an expansion to an existing manufactured home park or subdivision. This subsection does not apply to manufactured homes to be placed or substantially improved in an existing manufactured home park or subdivision, except where the repair, construction or improvement of the streets, utilities and pads equals or exceeds fifty percent of the value of the streets, utilities and pads before the repair, reconstruction or improvement has commenced.~~ (Ord. 3946 § 1 (part), 2004)

(5) Recreational vehicles placed on sites are required to either:

- 1) Be on the site for fewer than 180 consecutive days, (or)
- 2) Be fully licensed and ready for highway use, on wheels or jacking system, attached to the site only by quick disconnect type utilities and security devices, and have no permanently attached additions; or
- 3) Meet the requirements of KMC 21.56.090 (E)(4)

Section 13. Section 21.56.095 of the Kirkland Municipal Code is hereby amended to read as follows:

**21.56.095 Floodways.**

Located within areas of special flood hazard established in Section 21.56.030 are areas designated as floodways. Since the floodway is an extremely hazardous area due to the velocity of floodwaters which carry debris, potential projectiles, and erosion potential, the following provisions apply:

(1) Prohibit encroachments, including fill, new construction, substantial improvements, and other development unless certification by a registered professional engineer or architect is provided demonstrating through hydrologic and hydraulic analyses performed in accordance with standard engineering practice that encroachments shall not result in any increase in flood levels during the occurrence of the base flood discharge.

(2) If subsection (1) of this section is satisfied, all new construction and substantial improvements shall comply with all applicable flood hazard reduction provisions of Sections 21.56.085 through 21.56.105.

(3) Construction or reconstruction of residential structures is prohibited within designated floodways, except for (A) repairs, reconstruction or improvements to a structure which do not increase the ground floor, and (B) repairs, reconstruction or improvements to a structure, the cost of which does not exceed fifty percent of the market value of the structure, either (i) before the repair, reconstruction or improvement is started or (ii) if the structure has been damaged and is being restored before the damage occurred. Work done

on structures to comply with existing health, sanitary or safety codes, or to structures identified as historic places, ~~shall~~ may not be included in the fifty percent of market value limitation.

Section 14. Section 21.56.105 of the Kirkland Municipal Code is hereby amended to read as follows:

**21.56.105 Standards for shallow flooding areas (AO zones).**

Shallow flooding areas appear on FIRMs as AO zones with depth designations. The base flood depths in these zones range from one to three feet where a clearly defined channel does not exist, or where the path of flooding is unpredictable and where velocity flow may be evident. Such flooding is usually characterized as sheet flow. In these areas, the following provisions apply:

(1) New construction and substantial improvements of residential structures within AO zones shall have the lowest floor (including basement) elevated above the highest adjacent grade of the building site, to or above the depth number specified on the FIRM (at least two feet if no depth number is specified).

(2) New construction and substantial improvements of nonresidential structures within AO zones shall either:

(A) Have the lowest floor (including basement) elevated above the highest adjacent grade of the building site, to or above the depth number specified on the FIRM (at least two feet if no depth number is specified); or

(B) Together with attendant utility and sanitary facilities, be completely floodproofed to one foot above the depth number specified on the FIRM ~~or above that level~~ so that any space below that level is watertight with walls substantially impermeable to the passage of water and with structural components having the capability of resisting hydrostatic and hydrodynamic loads and effects of buoyancy. If this method is used, compliance shall be certified by a registered professional engineer or architect as in Section 21.56.090(2)(C).

(3) Require adequate drainage paths around structure on slopes to guide floodwaters around and away from proposed structures.

(4) Recreational vehicles placed on sites within AO Zones on the community's FIRM are required to either:

i) Be on the site for fewer than 180 consecutive days, or

ii) Be fully licensed and ready for highway use, on its wheels or jacking system, is attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached additions; or

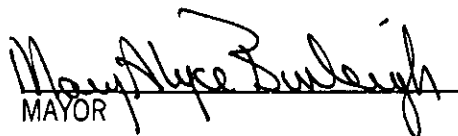

iii) Meet the requirements of KMC 21.56.105 (1) and (3) above and the anchoring requirements for manufactured homes 21.56.085 (B).

Section 15. If any provision of this ordinance or its application to any person or circumstance is held invalid, the remainder of the ordinance, or the application of the provision to other persons or circumstances is not affected.

Section 16. This ordinance shall be in force and effect five days from and after its passage by the Kirkland City Council and publication pursuant to Section 1.08.107, Kirkland Municipal Code in the summary form attached to the original of this ordinance and by this reference approved by the City Council.

Passed by majority vote of the Kirkland City Council in open meeting this 6th day of September, 2005.

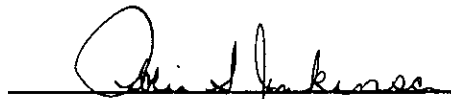

Signed in authentication thereof this 6th day of September, 2005.

PUBLICATION SUMMARY  
OF ORDINANCE NO. 4004

AN ORDINANCE OF THE CITY OF KIRKLAND RELATING TO MODIFICATIONS TO TITLE 21 OF THE KIRKLAND MUNICIPAL CODE REGARDING BUILDING AND CONSTRUCTION.

SECTION 1. Amends Section 21.06.255 of the Kirkland Municipal Code by adding the word "electrical" to permit expiration.

SECTION 2. Adds a new Section 21.06.572 to the Kirkland Municipal Code regarding limitations on authority.

SECTION 3. Repeals Section 21.08.070 of the Kirkland Municipal Code.

SECTION 4. Amends Section 21.08.075 of the Kirkland Municipal Code relating to overwater structures, piers, wharves, and buildings.

SECTION 5. Adds a new Section 21.08.077 and amends Chapter 32 of the International Building Code by deleting the regulation for encroachments 15 feet or more above grade and renumbering the following sections.

SECTION 6. Amends Section 21.20.030 of the Kirkland Municipal Code relating to flammable and combustible liquids.

SECTION 7. Adds a new Section 21.20.037 and amends Section 109.3 of the International Fire Code relating to violation penalties.

SECTION 8. Repeals Section 21.20.085 of the Kirkland Municipal Code.

SECTION 9. Amends Section 21.56.020 by defining "Basement", adding "or storage of equipment" to the definition of "Development" and defining "Recreational Vehicle" and renumbering the following sections.

SECTION 10. Amends Section 21.56.030 of the Kirkland Municipal Code to include any revisions to the "Flood Insurance Study for the City of Kirkland."

SECTION 11. Amends Section 21.56.085 of the Kirkland Municipal Code by referencing a new guidebook for manufactured home installation in flood hazard areas."

SECTION 12. Amends Section 21.56.090 of the Kirkland Municipal Code deleting a subsection applying to manufactured homes and adding a subsection relating to recreational vehicle placed on sites.

SECTION 13. Amends Section 21.56.095 of the Kirkland Municipal Code by requiring that hydrologic and hydraulic analyses be performed in accordance with standard engineering practice for proposed encroachments in floodways.

SECTION 14. Amends Section 21.56.105 by clarifying the required floodproofing height in AO zones and adding a subsection relating to recreational vehicles in AO zones.

SECTION 15. Provides a severability clause for the ordinance.

SECTION 16. Authorizes publication of the ordinance by summary, which summary is approved by the City Council pursuant to Section 1.08.017 Kirkland Municipal Code and establishes the effective date as five days after publication of summary.

The full text of this Ordinance will be mailed without charge to any person upon request made to the City Clerk for the City of Kirkland. The Ordinance was passed by the Kirkland City Council at its meeting on the 6th day of September, 2005.

I certify that the foregoing is a summary of Ordinance 4004 approved by the Kirkland City Council for summary publication.

  
City Clerk
