3. Due to the existing bank along the southern boundary of the subject site, it appears that a sign would need to be located further back from the existing right-of-way of N.E. 68th Street and higher than would be allowed pursuant to Section 23.32.030, in order for a sign to be seen from N.E. 68th Street as has been indicated by the applicant.

A. SUMMARY OF THE PROPOSED ACTION:

1. This is an application for a Conditional Use Permit to erect a free standing sign to be located within the Lake Vista Apartment Complex.
2. The proposed sign is to be located along and oriented to N.E. 68th Street and will be 12.5 square feet in area and 10 feet in height above grade. Support piling will extend to 15 feet above grade. The proposed sign is to be located 35 feet from the N.E. 68th Street right-of-way. The proposed sign is to be constructed of wood and mounted on pilings. (Exhibit "A", "B", and "C").
3. Justification of this proposed action has been identified by the applicant as:
 - a. "The signs are attractive and unobtrusive and should be harmonious with the neighborhood."
 - b. Due to the curb of the adjacent road and an abrupt slope away from the entrance to the property, it is necessary to position a sign well into the complex. To be visible from the street, it will therefore need to be raised higher than would otherwise be necessary.
 - c. The sign is well designed and attractive and will make locating the complex much easier.
 - d. The previous sign (which was blown down) was located on the street right-of-way and would not be able to be re-built."

B. HISTORICAL BACKGROUND:

4. The applicant has applied for and received a Variance from the Board of Adjustment, File No. V-75-37(B), to allow for this proposed sign to exceed the maximum area of 10 square feet as per the Kirkland Zoning Ordinance, Section 23.32.030.

C. GOVERNMENTAL COORDINATION:

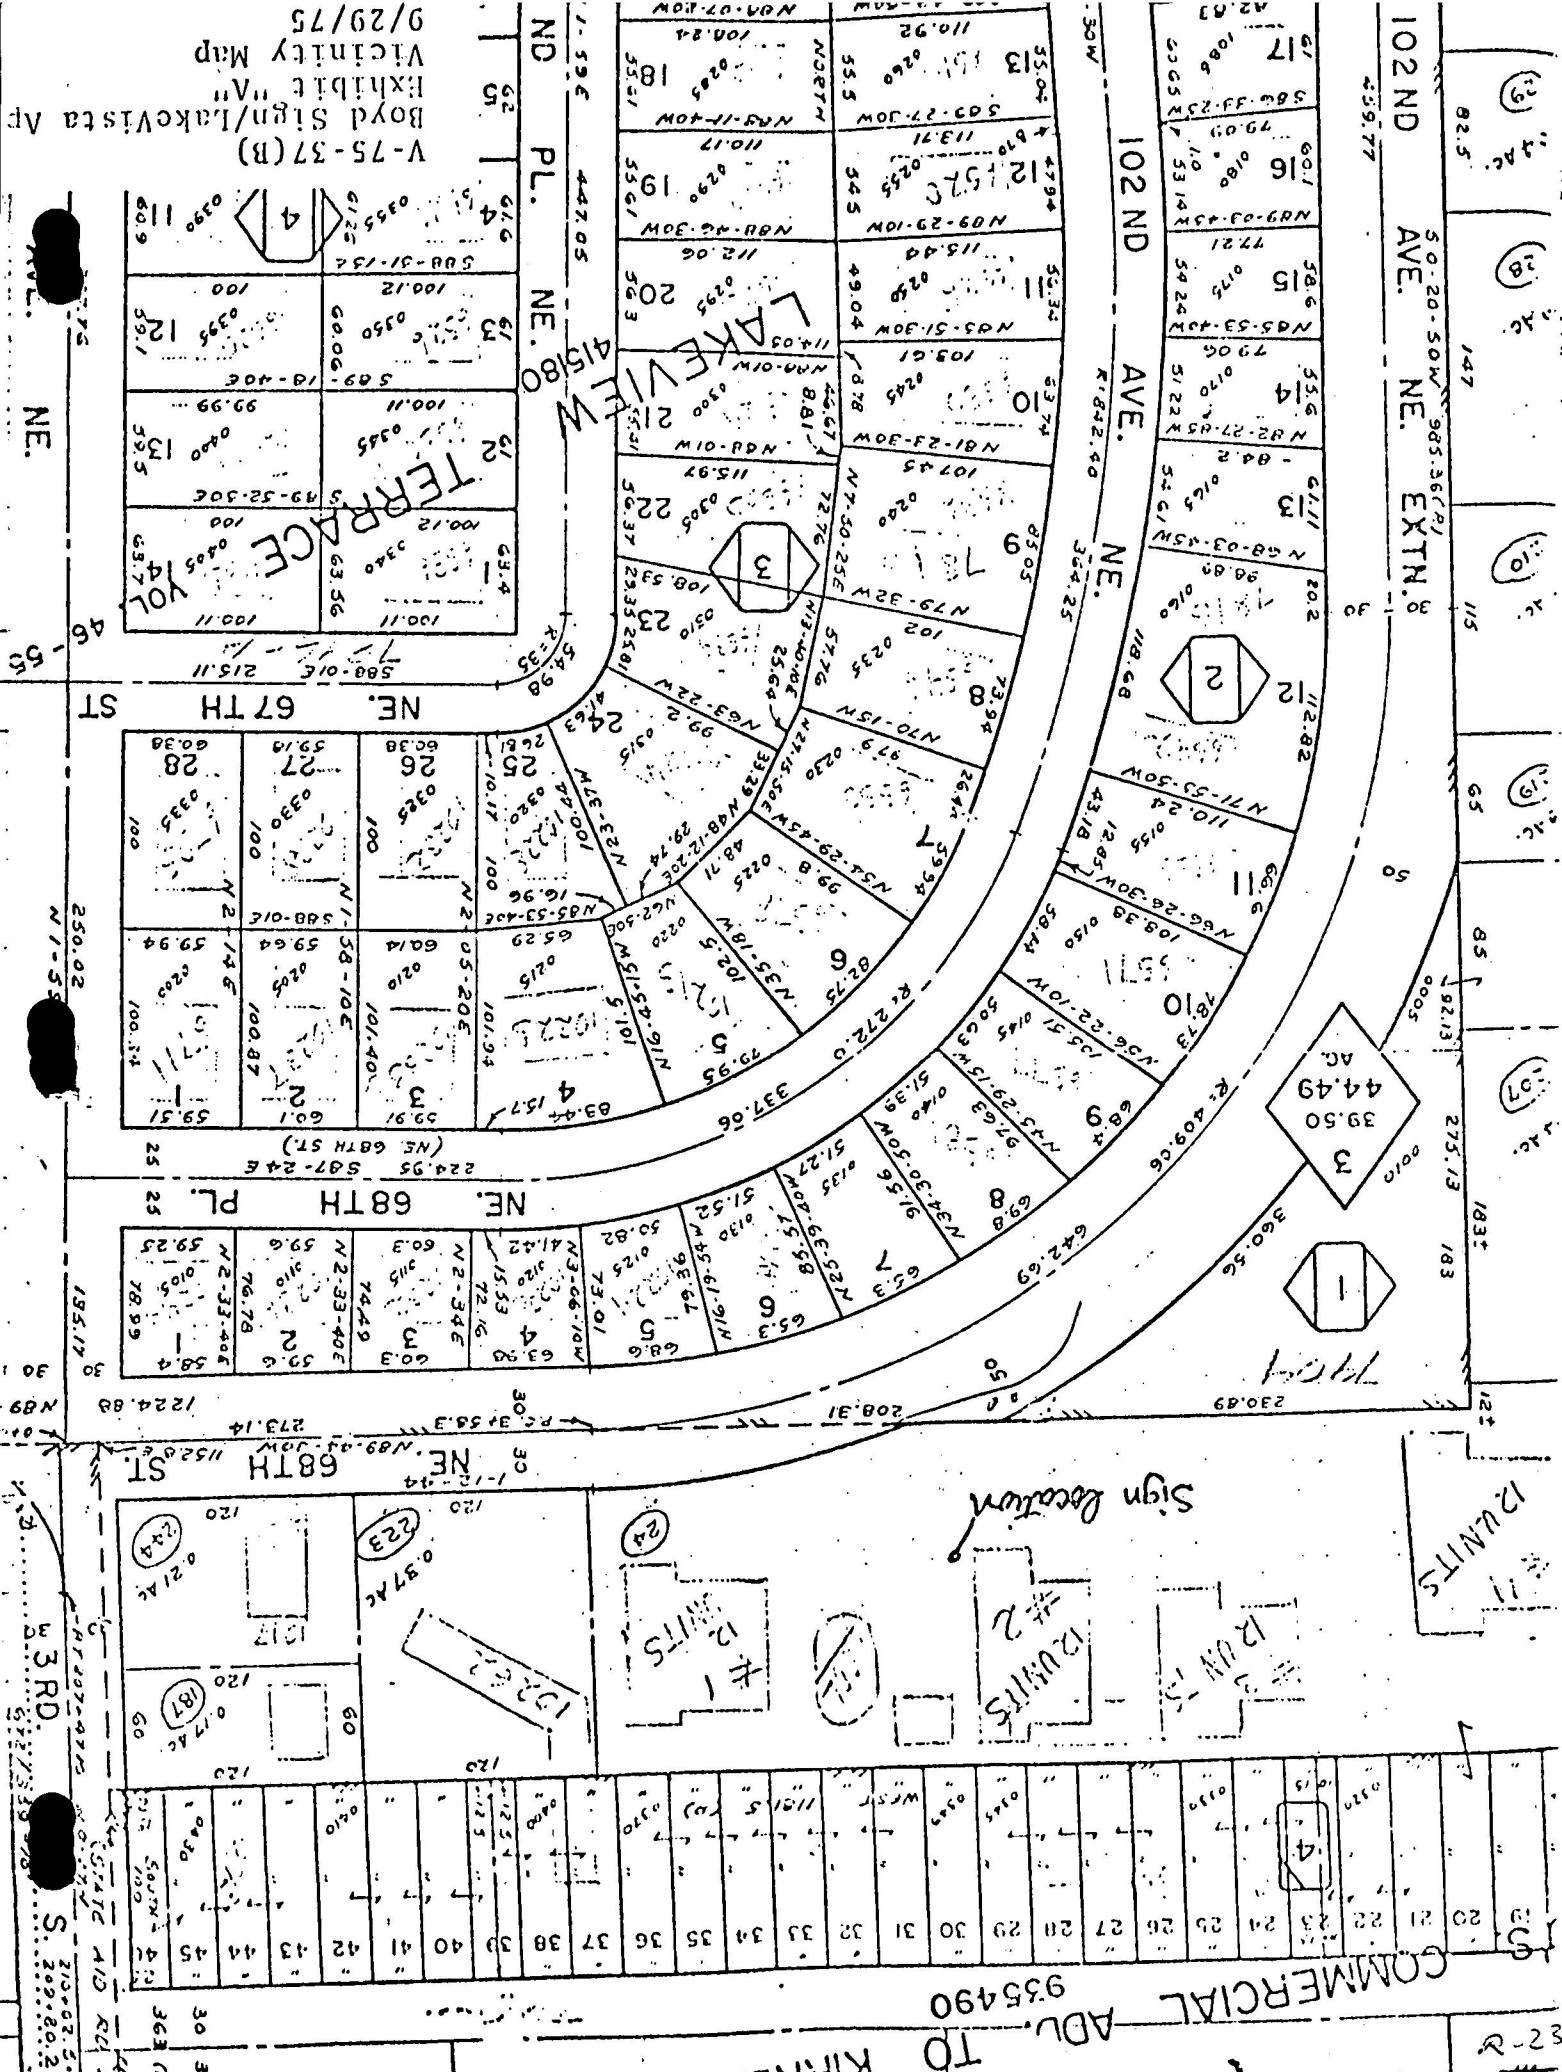

5. The Kirkland Public Service Department, Department of Fire Services, Building Department, Park Department and Police Department have no comment on this proposal.

D. EXISTING PHYSICAL CHARACTERISTICS:

6. Topography. The subject property appears to slope in a westerly direction with a slope of approximately 6°. There is an existing 6 foot high bank along the southern boundary of the subject site.
