SUMMARY OF RECOMMENDATIONS:

Department of Planning and Community Development. Approve with conditions

Hearing Examiner. Approve with conditions

PUBLIC HEARING:

After reviewing the official file which included the Department of Planning and Community Development Advisory Report and after visiting the site, the Hearing Examiner conducted a public hearing on the application The hearing on the Sternoff application was opened at 9 27 a.m , June 13, 1991, in the Council Chamber, City Hall, 123 Fifth Avenue, Kirkland, Washington, and was closed at 9 38 a.m Participants at the public hearing and the exhibits offered and entered are listed in this report. A verbatim recording of the hearing is available in the City Clerk's office The minutes of the hearing and the exhibits are available for public inspection in the Department of Planning and Community Development.

FINDINGS, CONCLUSIONS, AND RECOMMENDATION:

Having considered the entire record in this matter, the Hearing Examiner now makes and enters the following

I FINDINGS

- A** The findings of fact recommended on pages 6 to 18 of the Department of Planning and Community Development Advisory Report (Hearing Examiner Exhibit A) are found by the Hearing Examiner to be supported by the evidence presented during the hearing and, by this reference, are adopted as part of the Hearing Examiner's findings of fact. A copy of said report is available in the Department of Planning and Community Development.
- B** Staff said at the hearing that the Land Use Policies Plan indicates 12 dwelling units per acre for the subject property. The proposed project would be at a density of approximately 9 dwelling units per acre. Staff also said that if the stream stayed in the culvert, then no setback from the stream would be required. This proposal will open the stream across the subject property.
- C** One letter was received (Exhibit B). Several concerns were expressed about increased density in the area, but the letter did state that the rezone may be allowable if several considerations/concerns are addressed. Those considerations include noise, building heights, landscaping, greenbelt and creek protection, and design revisions. The letter discusses those concerns in detail.
- D** The applicant said he concurred with the conditions recommended by staff. He also said that he has no problem with a covenant which would limit the height of trees on his site, however, he felt it would have little effect since there is a 20-foot-wide strip of property which he does not own between his site and the home to the east.

II CONCLUSIONS

- A** The conclusions recommended by the Department of Planning and Community Development, as set forth on pages 6 to 19 of the Department's Advisory Report (Exhibit A), accurately set forth the conclusions of the Hearing Examiner and, by this reference, are adopted as part of the Hearing Examiner's conclusions. A copy of said report is available in the Department of Planning and Community Development.
- B** The issues raised by Mr. Bright in Exhibit B were adequately addressed by the staff report and at the hearing. In addition to the landscaping on the subject site, the 20-foot-wide strip of land between the subject site and property with the existing house to the east will continue to provide visual and noise buffering. A covenant which would limit the height of trees on the subject site would be of little value if there is no corresponding covenant on the 20-foot strip of property which the applicant doesn't own.

III RECOMMENDATION

Based upon the foregoing findings of fact and conclusions, approval of this application is recommended subject to the following conditions

- 1 This application is subject to the applicable requirements contained in the Kirkland Municipal Code, Zoning Code, and Building and Fire Code. It is the responsibility of the applicant to ensure compliance with the various provisions contained in these ordinances. Attachment 4, Development Standards, is provided in Exhibit A to familiarize the applicant with some of the additional development regulations. This attachment does not include all of the additional regulations. When a condition of approval conflicts with a development regulation in Exhibit A, Attachment 4, the condition of approval shall be followed.

- 3 The Department of Planning and Community Development shall be authorized to approve minor modifications to the approved site plan, provided that
 - a. The change will not result in reducing the landscaped area, buffering areas, or the amount of open space on the project,

 - c. The change will not result in any structure, or vehicular circulation or parking area being moved more than 10 feet in any direction, and will not reduce any required yard,
 - d. The change will not result in any increase in height of any structure, and
 - e. The City determines that the change will not increase any adverse impacts or undesirable effects of the project, and that the change in no way significantly alters the project (see Exhibit A, Conclusion II D 8 b)

- 6 Prior to occupancy, the applicant shall
- a Complete all site improvements indicated on the site plan approved by the Department of Planning and Community Development at the time of application for a Building Permit (see Exhibit A, Conclusion II D 12 b)
 - b Complete construction of streambed and streambanks and protective fencing along the edge of the driveway adjacent to the stream setback. Install appropriate native Northwest vegetation as shown on the required plan. Final approval should be subject to inspection by a qualified professional approved by the City (see Exhibit A, Conclusions II C 1 b and II D 4 b (1))

- c Install a fully-operational permanent storm water control system, including an approved driveway design to direct storm water away from the on-site stream (see Exhibit A, Conclusion II D 5 b)
 - d Complete interior sprinkler system in the east building and other improvements necessary to meet fire flow requirements (see Exhibit A, Conclusion II E 1 b)
